Professional summary

Energetic Computer Science with specialization in Artificial Intelligence and Machine Learning undergraduate (CGPA 8.39) specializing in Web development and DSA. Experienced in leading student teams, building creative websites, and delivering polished project artifacts . Seeking hackathon opportunities and short-term freelance roles where I can make some of the best websites.

Technical skills

- **Languages:** CPP , Java , Python , SQL , HTML , CSS , JavaScript , Shell Scripting.
- **Algorithms & DSA:** Currently studying CPP and core data structures & algorithms; comfortable with problem-solving on Leetcode and GFG.
- **Other:** Git/GitHub, solved **200+ DSA problems** on LeetCode and GeeksforGeeks combined.

Learning & focus

Currently strengthening Operating Systems, DBMS, advanced tools to enhance my Web Development Projects. Actively practicing DSA for coding rounds and interviews.

Education

Krishna Institute of Engineering and Technology (KIET)
B.Tech in Computer Science Engineering (Artificial Intelligence & Machine Learning) 2024-2028
CGPA: 8.39/ 10 Krishna Institute of Engineering and Technology (KIET)

Elpis Global School
Senior Secondary Education
(Class XII – CBSE)
Percentage: 82%

Selected projects

• AI-Based Smart Complaint Management System

Problem: Need to develop a smart AI based smart complaint system in which a person or society people can write their complaints about problems in society and no need to go for offline complaints a official portal is need to made.

Approach: Build a frontend and backend with HTML, CSS, Javascript and using React and Node.js and Express.js with a MongoDB database and then deployed it on Render, it has Complaint Dashboard, Login and Register page.

What to demo / show judges:

Backend Deployment Link: <https://ai-smart-complaint-system.onrender.com/>

Frontend Deployment Link: <https://ai-smart-complaint-system-1.onrender.com/>

GITHUB Link: <https://github.com/UtkrishtVerma2005/ai-smart-complaint-system>

• Expense Tracker Management System

Problem: Need to develop a system that can track the expenses of the person, this contains login, register and the dashboard page containing all details about expenses.

Approach: Built using HTML, CSS, JavaScript and React and Node.js and Express.js and others frameworks.

What to demo / show judges:

Backend Deployment Link: <https://expense-backend-ccxo.onrender.com>

Frontend Deployment Link: <https://expense-frontend-94i1.onrender.com>

Certifications:

- Earned the AWS Certified Cloud Practitioner certification, demonstrating foundational knowledge of cloud computing, AWS services, security, pricing, and architecture principles.
- Completed Programming Using Java certification from Infosys Springboard, gaining knowledge of core Java concepts including OOPs, classes, inheritance, exception handling, and collections.
